## Summary

- A fundamental question for the District is how to “put on the show”- to provide equitable access to education safely and effectively in these times of COVID-19 and with social distancing and other safety measures in place.
- MPD is working with District decision-makers to respond to the pandemic by: developing alternative service delivery methods; delivering current and relevant data-driven enrollment and capacity analysis; creating GIS-based mapping and analysis; and managing accurate source data underlying District applications.
- MPD has to also be open for “business as usual”. This includes producing enrollment and birth projections (demand), analyzing operational capacity at school sites (supply), attendance boundary and resident area analysis and management, and GIS analysis and mapping.
- The LAUSD is only one of the many public agencies tasked with the responsibility to unwaveringly provide the people of California with essential services. Most especially in times such as these, we as public servants must serve the public good by making sure that “The Show Must Go On”!
